

The SUNGROW logo is displayed in a bold, orange, sans-serif font. The background of the slide features a series of white, glowing hexagonal outlines that create a sense of depth and perspective, receding towards the center.

**SUNGROW**

Clean power for all

# GRID TIE SOLAR INVERTER

Presented by

**Subhamay Ganguly**

# About Sungrow

The World's Most Bankable Inverter Brand

- **No.1** supplier in financed projects
- **100%** bankable

Source : BloombergNEF

**1997**

Founded by  
University  
Professor  
Cao Renxian

**2006**

Expanded to the  
Global Market  
with Products  
Installed  
Internationally

**2011**

Listed on  
Shenzhen  
Stock  
Exchange

**2015**

Secured #1  
Position of  
Global  
Market Share

**2018**

Opened the  
Company's First  
Factory Outside  
China in India

**2019**

Became the  
First Inverter  
Company to  
Hit 100GW

## 17.1GW

Shipments Hit in 2019  
Domestic 8.1GW, International 9GW

## 100GW+

Accumulated installations  
By the end of 2019

# About Sungrow / Production Capacity

The World's Largest  
Inverter Factory

**50 GW** / Year  
Global Production Capacity

China Factory  
**47 GW** / Year  
ESS **6 GW** / **6GWh**

India Factory  
**3 GW** / Year

## About Sungrow/ India Manufacturing Unit

**3GW** Annual  
Production capacity

Catering to Indian and  
Global Market

# About Sungrow/ Investment and Achievements

Core Technology  
Is the Permanent  
Power of Sungrow

**\$73 M**

Invested in R&D  
in 2018

**40%+**

Proportion of technical  
R&D personnel

**2000+**

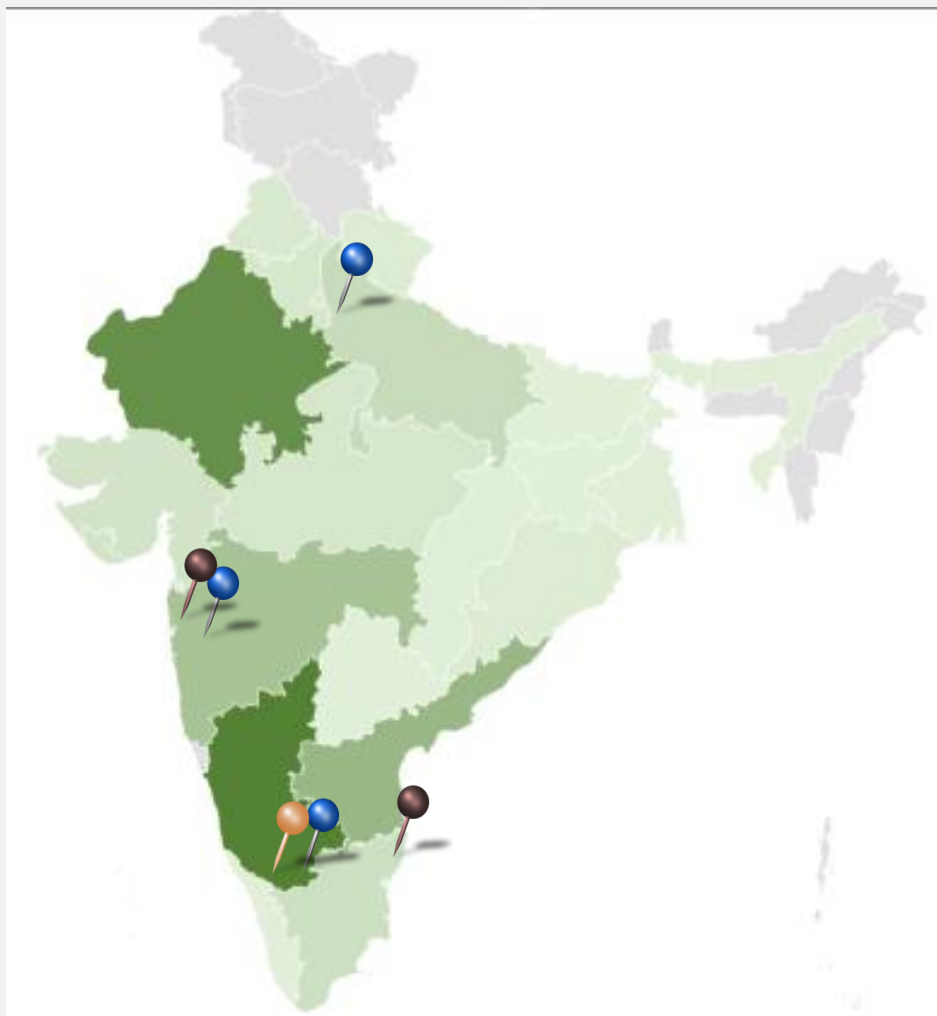

Patent applications  
accumulated

**NO.1**

Holder of patents  
in the industry

# Sungrow in India/ Presence & Milestones

 Branch Offices  
(Gurugram,  
Mumbai,  
Bengaluru)

 Manufacturing  
Facility  
(Bengaluru)

 FTWZ  
Warehouse  
(Chennai,  
Mumbai)

**8 GW+**

Order  
closure

**5+**

Years of  
successful  
performance

**12,000+**

Inverters  
installed

**22+**

States

# APPLICATIONS & CHALLENGES

## Applications of the Residential Inverter

**Residential rooftop**

**Dispersed users**

**PV plant capacity**  
2 - 20kW in general

**Grid voltage**  
220V/380V  
230V/400V

**Investment mode**  
Self-investment

## C&I Application Scenarios

- Commercial and Industrial Roof

- Plants Features

### PV plant capacity

Industrial and commercial:  $\leq 5\text{MW}$

### On-grid mode

Energy Bills reduced  
Self consumption  
Full on-grid

### Client Premises

High safety

## Challenges

### Challenges

#### High ROI Driven

#### Dispersed users, Difficult Installation and O&M

#### Low EMI, Safety First

### Inverters

#### High Yield & High Reliability

High efficiency:

High reliability:

High yield: Adapt to challenging grid conditions, maximum energy yields.

#### Easy O&M

Easy installation: Light weight, plug and play terminals.

Easy commissioning via APP; Easy O&M: easy connection with the plant monitoring platform for remote troubleshooting and parameter setting.

#### High Safety

Lightning protection: Specific for the PV system.

High security: High-precision electric leakage protector.

High power quality: No interference on the client equipment.

Low EMI: Compliance with home appliances standards

## INTRODUCTION OF SOLAR PV INVERTERS

## Introduction: PV Inverters

Solar PV Inverters come in different form factors like

String PV inverter

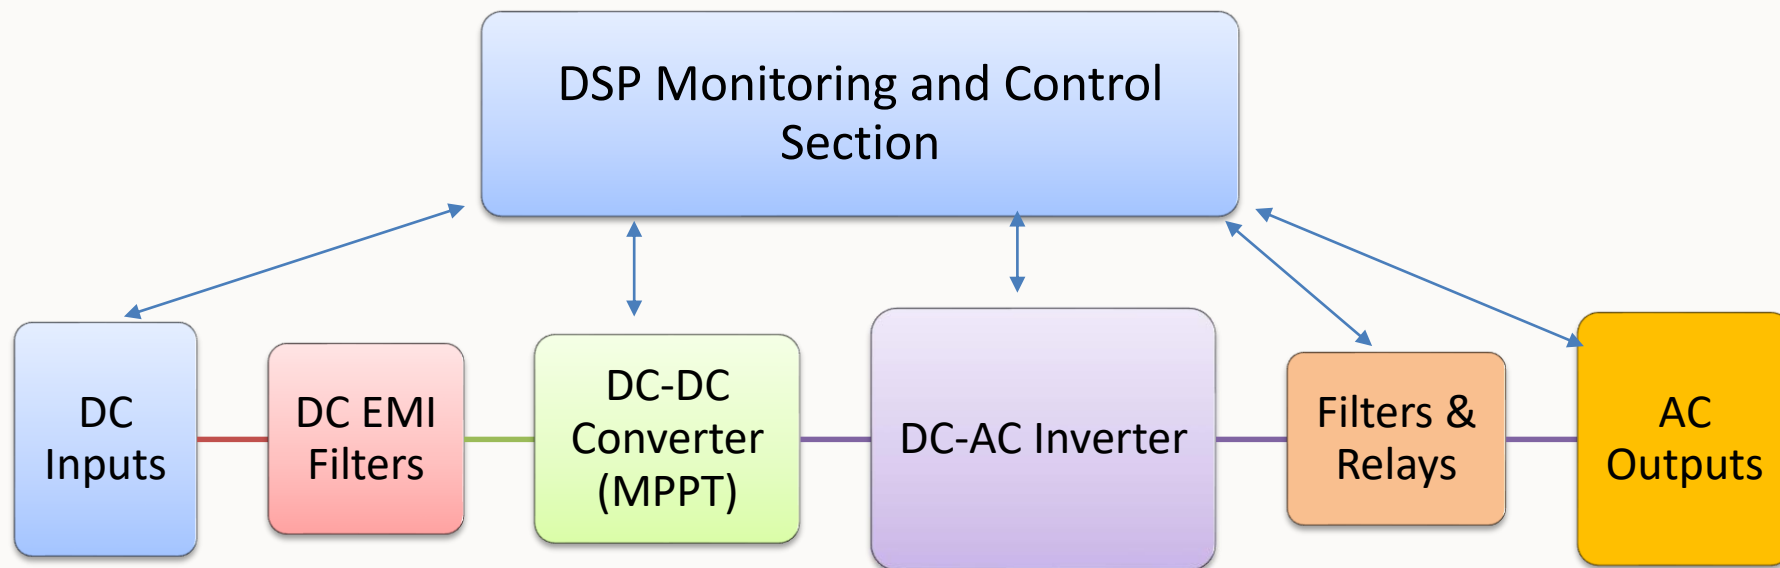

Indoor Central PV Inverter

Outdoor Central PV Inverter

The internal structure is similar

## Block Diagram of string inverter

## PV Inverters Interface

### Input Interface of Inverter

- Consists of Direct string connectors(MC4) or Busbar for field connections from Combiner boxes
- The input is merged on to a single bus and filtered for EM noise from switching circuit

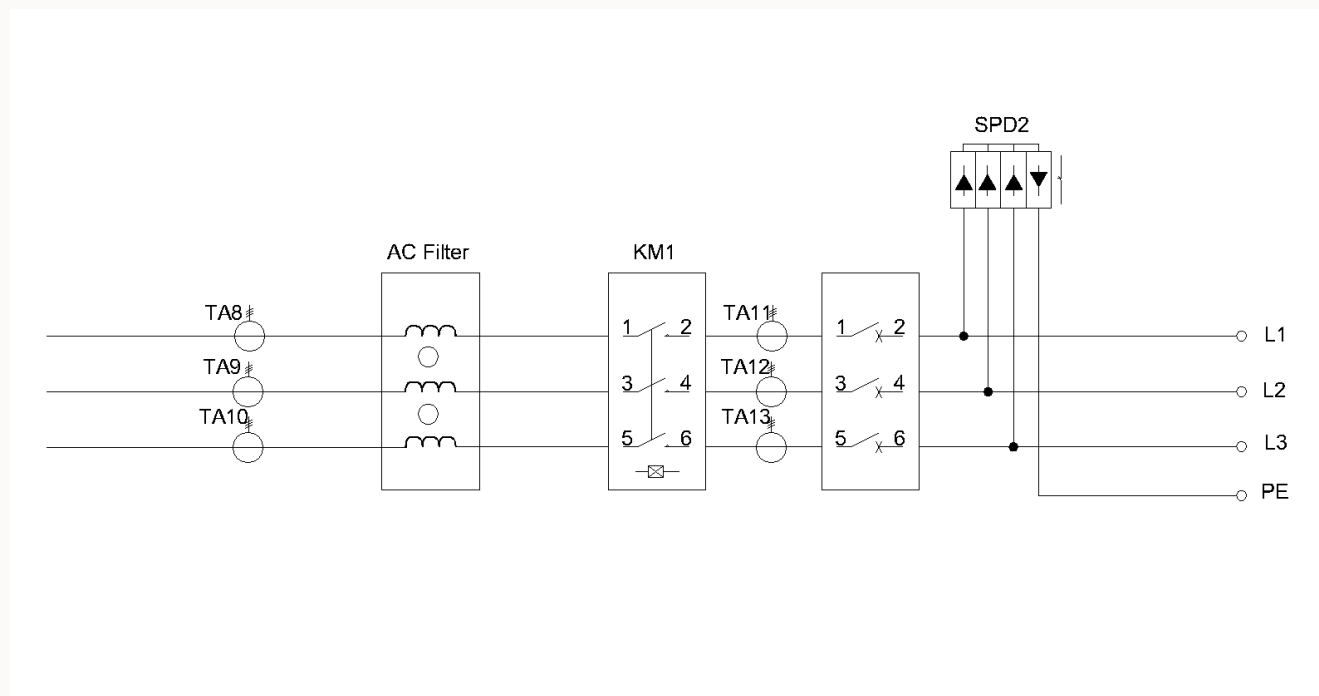

## PV Inverters Interface

### Output Interface of Inverter

- Consists of Terminal Blocks/Bus Bar for AC cable connections.
- The output from converter stage is merged on to a single bus and tuned for fundamental frequency via sine wave and EMI filters

## Power Quality and Reliability Standards

---

- IEC 61727 Photovoltaic (PV) systems - Characteristics of the utility interface
- IEC 61683 Photovoltaic systems -Power Conditioners - Procedure for measuring efficiency
- IEC 62116-2014 Utility-interconnected photovoltaic inverters - Test procedure of islanding prevention measures
- IEC 62109-1 & 2 Safety of power converters for use in photovoltaic power systems
- IEC 61000 Electromagnetic Compatibility
- IEC 60068 Environmental Testing
- EN 50530 - Overall efficiency of grid connected photovoltaic inverters

## INVERTER KEY FEATURES

## Inverter Different Features

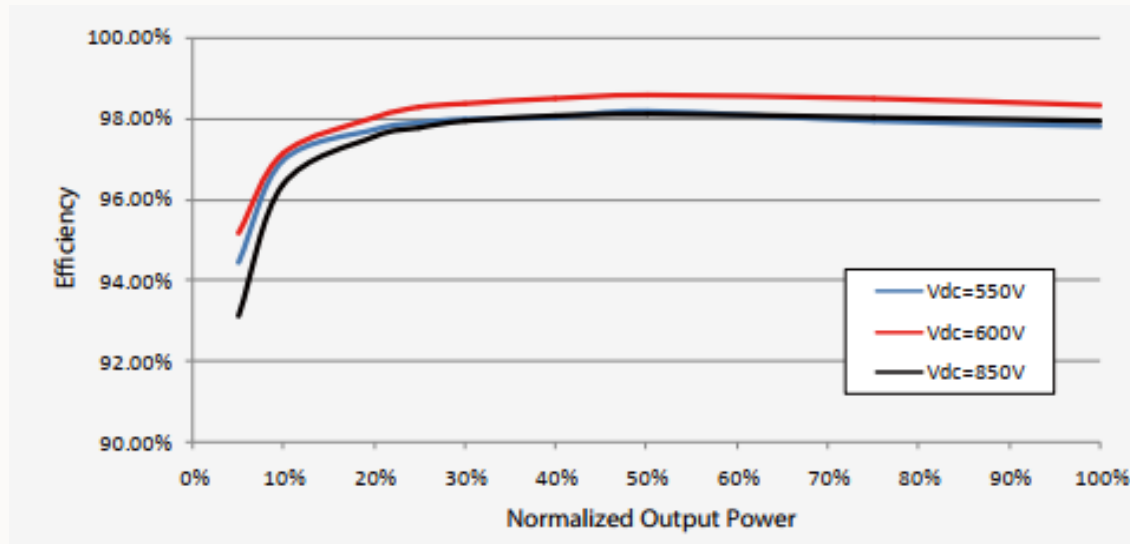

Low start up voltage (250V) enables long generation hour  
Voltage range: 200V – 1000V

Multi MPPT will keep supplying power to grid during partial shadow

## Inverter Different Features

High Euro Efficiency enables conversion loss minimum at any load.

High power quality with <3% current THD

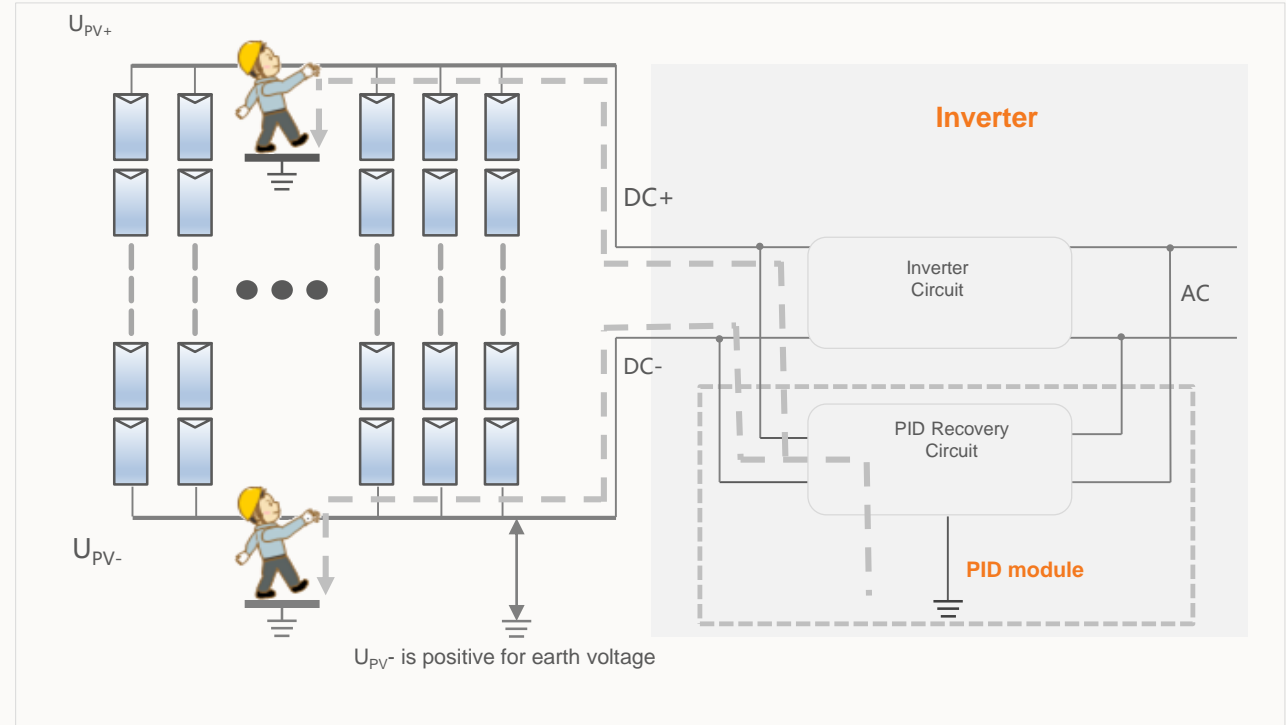

## Inverter Different Features

RS485 for remote monitoring;

Bluetooth + Mobile app communication for easy monitoring (No requirement of poor quality LCD display and multiple replacements);

Wi-Fi optional

PID recovery solution

## MPPT

### MPPT Converter stage

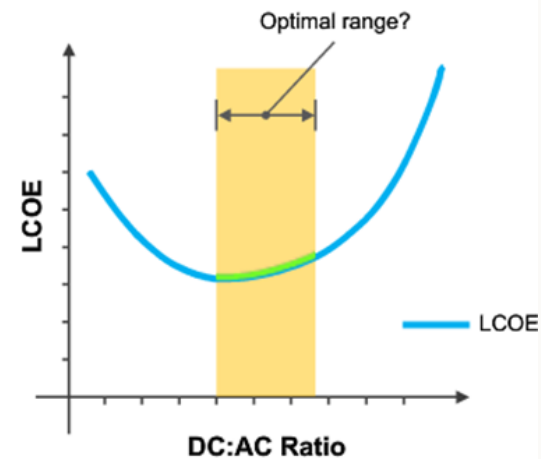

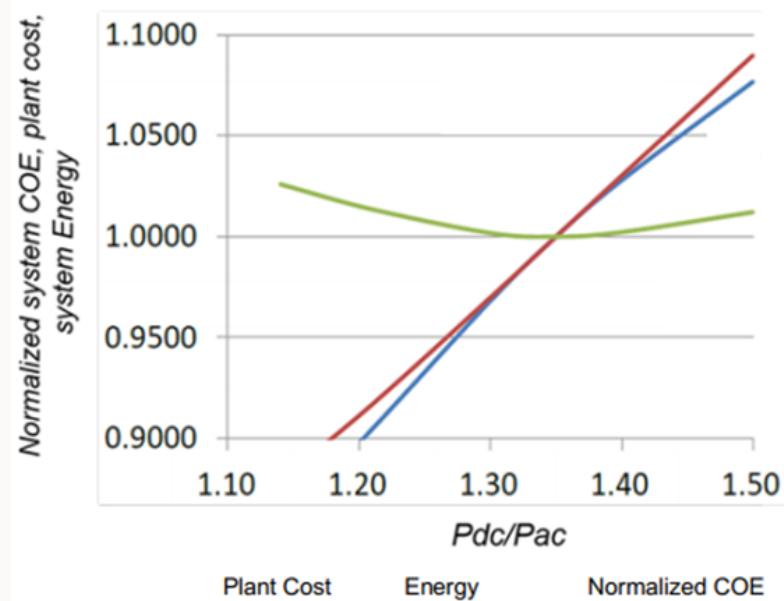

- Perturbation and Observation
- In the P&O method, the “ $dP/dV$ ” value of the system is continuously tracked.

## DC/AC Ratio

Energy generation throughout the day for different DC/AC Ratio

Effect on LCOE on DC/AC ratio

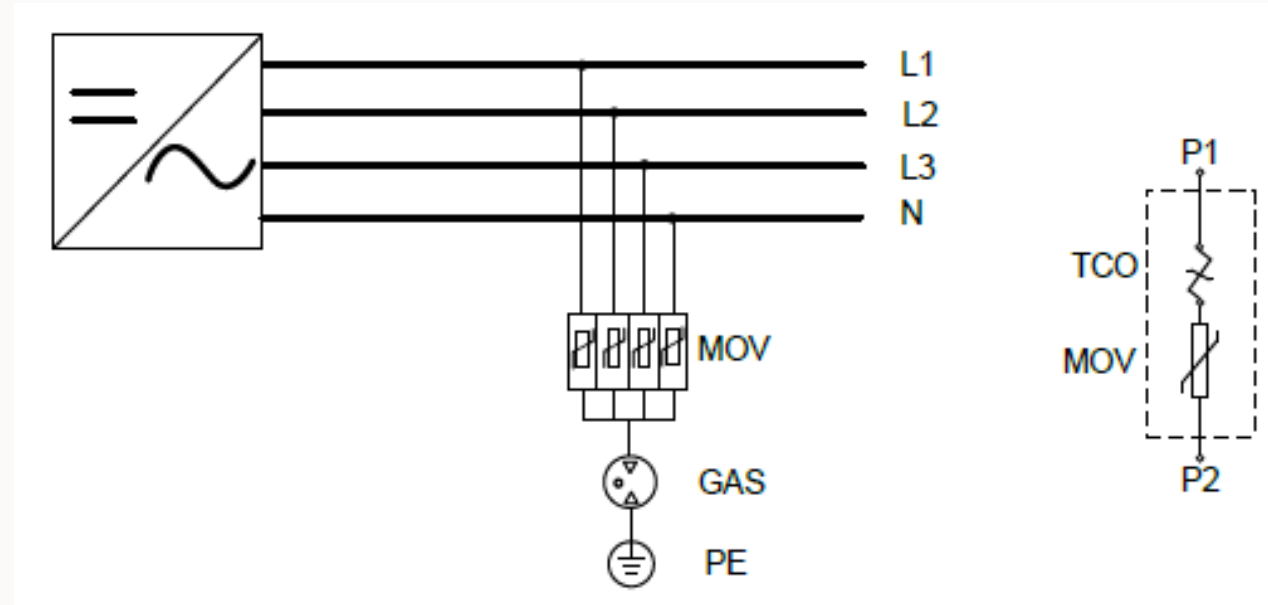

## Surge Protection

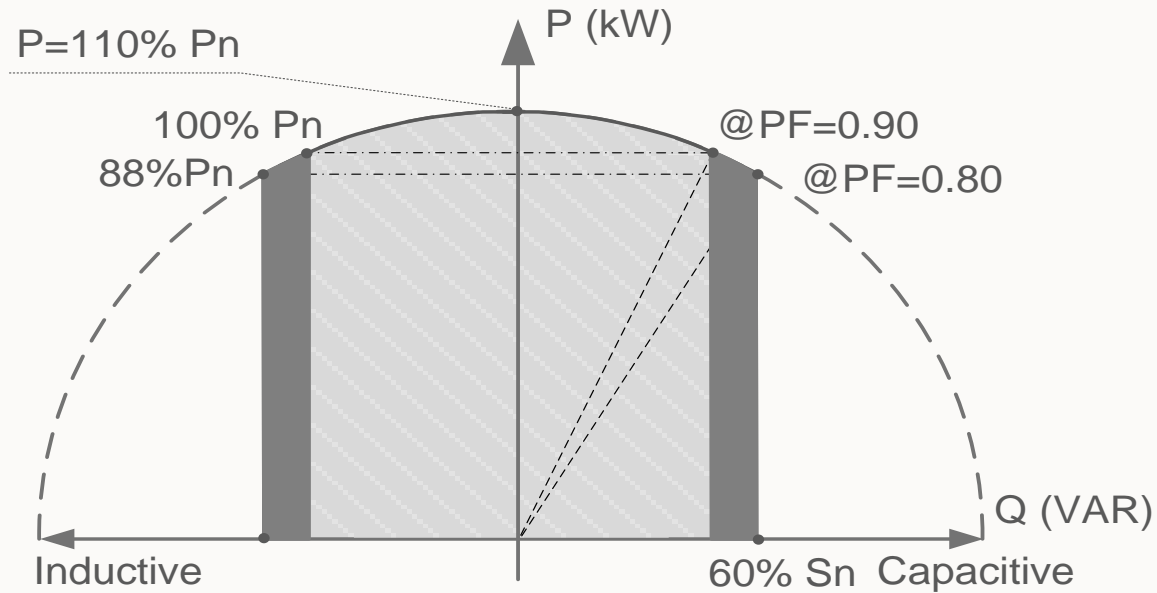

DC Side SPD

AC Side SPD

- Inbuilt Type II Surge Protection device (SPD) both at AC & DC side
- SPD's conforming International standard IEC61643-11
- Inverter safety is taken care with IEC62109-1&2

## Reactive Power Support

**Great reactive capacity**

**Reactive fast response**

**Four control modes**

**Save investment**

## Forced Air Cooling, Lower temperature, Longer lifetime

IGBT Temp comparison by  
Forced Air cooling vs  
Natural cooling

**The lifetime of electronic devices  
get halved for every 10°C increase  
in temperature**

## Anti-Corrosion

- C5 Anti Corrosion is the highest grade available and best suitable for highly corrosive, salty, mist environment..

### Applicable Environment

- Suitable for areas within 350 meters away from the sea with high temperature, high humidity, high pollutant and high salinity

Place: Japan  
On-grid time: 2017

Capacity: 200kW  
Features: within 100m away from sea

## Weight

Easy Operation,  
Accessibility

### String Inverter

- Whole unit replacement
- Easy & Quick replacement
- More failure points due to more devices

## SUNGROW SOLUTION

## Products &amp; Solutions / India

	Utility	 SG5000UD-20	 SG3125HV-20	 SG250HX-IN	
	C&I	 SG110CX	 SG33/50CX	 SG15/20 KTL-M	 SG10/12 KTL-M
	Residential	 SG3K-D, SG5K-D			
	Monitoring	 iSolarcloud	 COM100D/A	 APP	 EyeM4/ Wifi

## C&I inverter Specifications

Critical Parameters	SG50CX
<b>Input (DC)</b>	
No. of MPPT * Number per MPPT	5*2
<b>Output (AC)</b>	
Nominal AC voltage	
AC output power	55 kVA @ 40 °C / 50 kVA @ 45 °C
Max. AC output current	83.6A
<b>General Data</b>	
Max, efficiency / Euro. Efficiency	98.7% / 98.4%
Degree of protection & corrosion	IP66 & C5
Dimensions (W*H*D)	782 * 645 * 310 mm
Weight	62kg

## SUNGROW- C&I REFERENCES

## C&I Applications/ Indian Railways

Gandhi Nagar Railway Station

Multiple projects across various Indian Railway Stations

Total Project Size **50 MW+**

Inverter capacity **10kW, 20kW, 33kW,  
50kW, 100 kW**

Running since **2017 - 2019**

## C&I Applications/ Metro Station

Vinod Nagar & Kalkaji Metro, Delhi

Project Size

**1.25 MW**

Inverter capacity

**50 kW**

Running since

**2017**

## C&I Applications/ Automobile

Ashok Leyland

Total Project Size

**4 MW**

Inverter capacity

**50 kW, 60 kW**

Running since

**2017**

## C&I Applications/ Healthcare

AIIMS Bhubaneswar

Total Project Size

**1 MW**

Inverter capacity

**50 kW**

Running since

**2019**
